

# A message for stock truck drivers

Waitomo District Council appreciates that you use the **Stock Truck Effluent Disposal Facility** at the entrance to the Te Kuiti stock yards.

**Emptying your truck means there is less effluent on the roads.**

Just lately we have noted that some trucks have kept driving through the facility while emptying the truck's effluent tanks, leaving a long trail of effluent.

The facility can only be accessed one way, which is sign posted with '**ENTRY**'.

**Trucks must STOP over the grill to empty effluent.**

Entering the facility from the 'EXIT' or sale yard end will trigger the steel plate to start washing the grill before the truck has arrived onto the grill. This leaves behind a mess and causes a nuisance.

By entering the facility from the correct direction, the wash cycle will start when the truck exits.

**Thank you for your cooperation.**

**Phone 0800 932 4357**
