

Quick tips for water conservation

#1

Take 5-minute showers instead of baths. One full bath tub uses around 200 litres of water.

Every effort you make to conserve water will make a big difference.

Quick tips for water conservation

#4

Don't use your toilet as a rubbish bin. This wastes water and contributes to blockages in the sewerage system. Flush to dispose of organic body waste and toilet paper only.

Every effort you make to conserve water will make a big difference.
