**My comments on this proposal**

This is an ambush tactic by council. Forests that were planted 30 years ago are now being harvested. Council should have thought of this years ago, and made appropriate provision, and not left it to this late stage when massive investment in harvesting is being made by forest owners. This wave of harvesting over the next 15 years will bring employment and other wealth enhancement to the district, which should be balanced against trying to "stiff" forest owners when they face massive cost increases everywhere.
